Mr. Pastie Celebrates Grand Reopening

By Larry Cory

Mr. Pastie at 10 Bell Avenue in Pen Argyl celebrated its grand reopening with a ribbon cutting yesterday.

Pasties have a long history going as far back as the Cornish immigrants who brought the pastie to the Slate Belt. Quarry workers often carried a pastie in a “blickey” (metal lunch pail) for “peace” which was known in the early days as break time.

The pastie was perfect for the workers since it was big enough to satisfy their lunchtime appetites.

Mr. Pastie produces those same pasties with fresh, warm meat & vegetable turnovers. Mr. Pastie meat and vegetable pasties are always handmade and finger-crimped. The secret is in the crust; tender and flaky pie crust. You can enjoy Mr. Pastie as a hot lunch on the go, a sit-down dinner, or even “brown-bag it” as a cold sandwich.

The pastie has actually been popular throughout the Slate Belt for nearly 140 years.

In the 1940s pasties were sold as fundraisers for improvements at Weona Park.

In Pen Argyl, Wednesday was known as pastie day, and DeNardo’s restaurant on Pennsylvania Avenue (RT 512) always featured pasties on Wednesdays.

The Olde English Food business which made pasties began in Bangor around 1966 before it was purchased by Joe Angelini in 1977. Angelini tweaked the old Cornish pastie recipe at his business on East Bell Avenue,

which is the present location of Mr. Pastie.

Pasties were made by hand, starting with the work of Shirley Suprys back in the late 1960s. For 18 years, Ms. Suprys, a Pen Argyl resident, was the “dough lady” at the bakery on Bell Avenue which was the forerunner of Mr. Pastie. She reportedly made dough for more than a million pasties in her career.

The dough recipe, back in the day, was simple: flour, salt, shortening and water molded to suit your fingers. There’s wasn’t a need for a measuring cup because the cooks knew how the dough should feel to touch.

Garnet Sleep, a Slate Belt native and advertising agent working in Washington D.C. introduced the pastie to a client in 1981 which was the seed for nationwide distribution. From there, Sleep and his wife Ceclia then formed Real English Foods to distribute Angelini’s pasties.

In January 1985, Sleep purchased the business and named it Mr. Pastie.

Pasties, incidentally, are also known as “meat pie,” however, the difference between the two is all in the structure. Pasties tend to be defined as a singular, folded pastry case with a crimped lid and a savory filling, typically of seasoned meat and vegetables. Pies, on the other hand, traditionally have a base and sides and a separate lid

Carrots, peas, rutabagas and turnips have all made their way into pasties at one time or another.

Research Uncovers The Best Way To Help Babies Learn To Talk

Scientists Say Babies Do Not Process Phonetic Information Until Seven Months

By Imogen Howse via SWNS

Speaking to babies in ‘sing-song’ speech - such as nursery rhymes - is the best way for them to learn how to talk, according to a new study.

Linguists have long considered phonetics - the smallest sound elements of speech, typically represented by the alphabet – to be the foundation of language.

Babies were thought to learn these small sound elements and add them together to make words.

However, new research by the University of Cambridge and Trinity College Dublin has found that babies do not process phonetic information until they are around seven months old, and still struggle to do so at around 11 months old – when they tend to say their first words.

This means, the study said, babies instead learn in their early months from rhythmic speech and information – with moments of emphasis in a song helping them learn when an individual word starts and ends.

Professor Usha Goswami, a neuroscientist at the University of Cambridge, said: “Our research shows that the individual sounds of speech are not processed reliably until around seven months old, even though most infants can recognize familiar words like ‘bottle’ by this point.

“We believe therefore that speech rhythm information is the hidden glue underpinning the development of a well-functioning language system.

“Infants can use rhythmic information like a scaffold or skeleton to add phonetic information on to.

“For example, they might learn that the rhythm pattern of English words is typically strong-weak, as in ‘daddy’ or ‘mummy’, with the stress on the first syllable.

“They can use this rhythm pattern to guess where one-word ends and another begins when listening to natural speech.

“So parents should talk and sing to their babies as much as possible or use infant-directed speech like nursery rhymes because it will make a difference to language outcome.”

Two-Year-Old Girl Gets New Heart For Christmas

She Underwent Emergency Surgery After Going Into Cardiac Arrest.

By Ashley Pemberton via SWNS

The parents of a little girl kept alive for 14 months by a machine say she is now looking forward to her best Christmas ever - after getting a new heart.

Brave Beatrix Adamson-Archbold, two, was rushed into hospital with suspected Covid, but was actually suffering from heart failure.

Doctors diagnosed her with dilated cardiomyopathy and after emergency surgery she went into cardiac arrest.

She was then connected to a mechanical heart at Newcastle Royal Infirmary for 14 months while her parents waited anxiously for a transplant.

Now, after being given a new heart, dad Terry Archbold and mum Cheryl Adamson are looking forward to her spending Christmas at home with the family.

The couple, who lost their daughter Isabel in 2018 to an unrelated heart condition, donated her heart for research.

And they have urged other parents to consider donating their children's organs.

Cheryl, of Burnopfield, County Durham, said: "If you asked someone if they would accept a donated organ, most likely the answer will always be yes, without hesitation.

"If you asked if they would provide the same gift to someone else, this reply can sometimes be met with uncertainty.

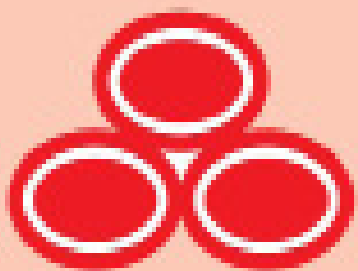

"The hesitation grows when it comes to considering your child being the donor of a lifesaving organ.

"When we were asked about donating Isabel's organs initially I did not want to agree.

"We eventually did agree to donate Isabel's heart for research and now I have seen how life changing this can be for families I would agree without hesitation.

"It could help save a life."

Little Beatrix, known as Bea, was rushed to hospital in May 2022 and spent the next 15 months there.

—WORLD— SOIL DAY

DECEMBER - 05

Each year on December 5th, World Soil Day (WSD) highlights the importance of healthy soil. It's also a day to advocate for the sustainable management of soil resources. One of the biggest concerns for the environment is soil degradation. Degradation is when soil health declines due to improper use or poor management. Most Americans are familiar with what happened during the Great Depression. Dust storms were a frequent occurrence. Soil erosion caused these massive dust storms. Through the years, farmers in this country learned their lesson. They began to practice better soil management. Unfortunately, however, there are still concerns about soil health. Throughout the world, the soil is eroding at a rapid rate. Every 5 seconds, the equivalent of one soccer field of soil erodes. If soil erosion continues, the earth will no longer be fertile. In turn, global food supplies and food safety will be threatened.

FREE LEAD WATER SUPPLY LINE HAZARDS REPLACEMENT

This is to ensure that you are aware of the new Slate Belt Rising partnership with Northampton County to serve the residents of East Bangor Borough. Slate Belt Rising is working on a press release and social media posts that will be sent out this week. Please keep an eye out. SBR would appreciate your help in spreading the word.

Dear Homeowner:

You are receiving this letter because your home is located in an area in need of a safety check to make sure there are no older water supply lines or fixtures in the service area of the East Bangor Municipal Authority. Several older water meters were found to be in service and the plan is to complete a safety check to make sure that there are no other older water supply lines or fixtures in this neighborhood.

Northampton County is working with our local partners Slate Belt Rising, Community Action Lehigh Valley, and the East Bangor Municipal Authority to offer a safety check of residents' interior home water supply lines for any hazards that may be present. We want to be able to say these neighborhood homes are free from any potential water supply line hazards.

Program participation is 100% FREE for residents in the East Bangor Municipal Authority service area.

Northampton County will check for the presence of water line hazards especially in any water line or fixture where lead may be an ingredient. As a rule, older homes are more likely to still have some lead presence in service lines and possibility in some interior plumbing fixtures. Northampton County will also check and replace any water supply line containing lead on the homeowner's side of the water meter. Northampton County's program will look at replacing manifolds/goosenecks, water meters, and older plumbing fixtures still containing lead. The program will use a PA-licensed plumber in any replacement and it will be free of charge for Northampton County homeowners.

Why are we so concerned with Lead?

Exposure to lead has been shown to harm especially very young child living in the home, exposure has been shown to effect brain development, contribute with learning-behavioral problems, and lower IQ's. Very young children are particularly susceptible to the build-up of lead hazards, as their smaller size increases their exposure levels, which is far more damaging to them than adults. As studies have shown that there is no safe level of lead. Lead is this public health menace take away the lead and the problem goes away.

How does lead get into drinking water?

Lead can enter drinking water when pipes and plumbing fixtures that contain lead corrode, especially where the water has high acidity or low mineral content. There are three main sources of lead:

• Lead pipes

• **Lead service lines**, the pipe that connects the water main under the street to the home's plumbing.

Lead pipes were also used in inside plumbing, but it is unusual. Congress banned the use of lead pipes in 1986.

• **Leaded solder** – Solder is used to connect copper pipe and fittings. Congress banned the use of leaded solder in 1986.

• **Leaded alloys** – Brass is frequently used in faucets and other plumbing components. In 1986, Congress limited the amount of lead in brass to 8% (close to the level of lead typical of products at the time) and later in 2014, reduced the limit to a much lower level (0.25%).

Christmas Tree Fundraiser

The Blue Mountain Community Library is once again sponsoring a Christmas Tree Fundraiser this year. Anyone wishing to honor or memorialize a loved one or a pet may purchase an ornament to hang on our Christmas Tree for \$5.00 each. The Fundraiser will begin November 1st and continue through December 31, 2023. Please consider helping the library by purchasing an ornament to decorate the Christmas Tree.

Visit our Book Nook to purchase books for the reader on your holiday list. Items include fiction and non-fiction books for adult, young adult and juvenile readers, as well as large print materials and puzzles.

The Blue Mountain Community Library is located at 216 S. Robinson Ave. in Pen Argyl. Hours are 10-12, Monday thru Saturday mornings and 6-8, Monday and Thursday evenings. All information is available on their Facebook page and website www.bmcl.org

Library Fund Raiser

On sday, December 5, 2023, the Slate Pub in Pen Argyl will sponsor a Fundraiser for the Blue Mountain Community Library. The Pub will generously donate a percentage of all food sales that day, from noon until closing, both eat-in and take-out, to the library. Anyone patronizing the Pub that day will enjoy good food and will help the library at the same time. The Slate Pub is located at 509 East Main Street, Pen Argyl, PA. Check out their menu at www.slatepub.com.
