Virus Survives Better in Cold Than Warm Temps

The new coronavirus may remain infectious for weeks on banknotes, glass and other common surfaces, according to research by Australia's top biosecurity laboratory that highlights risks from paper currency, touchscreen devices and grab handles and rails.

Virus survival declined to less than a day at 100 degrees Fahrenheit on some surfaces, according to the study, published in Virology Journal. The findings add to evidence that the Covid-19-causing coronavirus survives for longer in cooler weather, making it potentially harder to control in winter than summer. The research also helps to more accurately predict and mitigate the pandemic's spread, the scientists said.

"Our results show that SARS-CoV-2 can remain infectious on surfaces for long periods of time, reinforcing the need for good practices such as regular hand washing and cleaning surfaces," said co-author Debbie Eagles, the center's deputy director, in an emailed statement Monday.

Scientists at the Australian Centre for Disease Preparedness showed SARS-CoV-2 is "extremely robust," surviving for 28 days on smooth surfaces such as glass found on mobile phone screens and plastic banknotes at room temperature, or 20 degrees Celsius (68 degrees Fahrenheit). That compares with 17 days survival for the flu virus. (Bloomberg)

Wind Gap Turkey Drive

Thanksgiving is two months away. Plans are underway for another Turkey Drive this year for the food bank in Wind Gap .

Last year was a beautiful display of generosity on the community's part. That said, this year they want to start earlier, possibly reaching more people. Drop off date is not definitive as is not of yet. They suggest that you pick up an extra can of vegetables or mashed potatoes when you shop up to drop off date.

And if financially you can't help, there are other ways. A simple share and like is an incredible way to help.

The food bank accepts non perishable items throughout the year . There is a drop off box outside the old catholic church located on 512 and Genoga in Wind Gap . (On the Genoga side)

Library's Foreign Language Vocabulary Builder

The Bangor Public Library announces that it has added LingoLITE to its online reference offerings which helps users learn basic words and phrases in 30 languages using interactive native speaker videos.

"Foreign language training and references are very popular at the library, but in the past, we've never been able to offer one source for learning so many languages using such an interactive video format, so we're very excited to offer this database to our patrons," says Kathleen Lynch, Director at Bangor Public Library.

LingoLITE is a vocabulary builder and contains thousands of native speaker video clips in 30 languages including Spanish, French, Italian, German, Chinese, Japanese, Chinese, Farsi, Hindi, German, Swahili, Thai, and 18 others. Anyone can access LingoLITE using the library's computers, or from anywhere in the world from the library's portal at www.bangorlibrary.org with their library card.

LingoLITE was designed anyone who wants to learn basic terms and phrases in a new language. The resource has glossaries for greetings, introductions, food, transportation, relations, numbers, and more.

This is an example of the Library's mission to increase its coverage of topics that are of interest to its diverse population of patrons young and old.

National Fire Protection Week 2020

National Fire Protection Week 2020 is October 4th through October 10th. National Fire Protection Association (NFPA) announces that the 2020 National Fire Prevention Week theme will be, "Serve Up Fire Safety in the Kitchen."

NFPA's focus on cooking fire safety comes in response to home cooking fires representing the leading cause of U.S. home fires, with nearly half (49 percent) of all home fires involving cooking equipment; unattended cooking is the leading cause of these fires.

"Cooking continues to be a major contributor to the home fire problem," said Lorraine Carli, NFPA vice president of Outreach and Advocacy. "The good news is that the vast majority of these fires are highly preventable. This year's Fire Prevention Week campaign works to better educate the public about where potential cooking hazards exist and basic but critical ways to prevent them."

Carli notes that this year's focus on cooking safety is particularly timely. "As the public may continue to avoid restaurants for some time and opt instead to do more cooking and entertaining at home, the potential for home cooking fires will likely increase as well."
